EDUCATION

B.Tech. in Biotechnology

Amity University, Noida [2022-2026]

8.6 CGPA

Central Board of Secondary Education (C.B.S.E) -XII

89.7%

DL DAV Model School, Delhi

Central Board of Secondary Education (C.B.S.E) -X

84.3%

DL DAV Model School, Delhi

SKILL SET

Programming Languages: C, C++, Python, JAVA, JS, C#

AI & Data Analytics: Machine Learning, Predictive Modeling, Computer Vision, Statistical Analysis, Data Visualization

Full Stack Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, FastAPI, REST APIs

Libraries & Frameworks: TensorFlow, OpenCV, NumPy, Pandas, Scikit-learn, Matplotlib

Tools & Platforms: VS Code, Git/GitHub, Jupyter Notebook

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, GitHub Actions, CI/CD, Nginx

Core Strengths: System design & backend architecture, Debugging & log-based issue analysis, Deployment & reliability engineering, Basic networking (HTTP, DNS, IP)

Languages: English (Professional), Hindi (Native), Japanese (JLPT N3), Russian (Beginner), Norwegian (Beginner)

EXPERIENCE

Designed and validated system components with a focus on reliability and real-world deployment. Performed iterative testing and analysis to improve system performance and stability. Collaborated with team members to identify issues, analyse outputs, and refine system behaviour.

IT & Data Analysis Intern (Python, Machine Learning, Data Analytics, FastAPI)

Anant Raj Cloud PVT. LTD. (May 2024- June 2025)

- Worked on VERITAS, an AI-based indoor air quality monitoring and risk intelligence system.
- Designed data processing pipelines using Pandas and NumPy for multi-parameter sensor data.
- Analysed multi-parameter sensor data and implemented risk scoring algorithms, visualization, and reporting workflows.
- Contributed to backend services and dashboards for environmental health decision support.

AI / Manufacturing Systems Intern (Python, Computer Vision, Machine Learning)

ZenKensa Project (Dec 2025 - Present)

- Built AI-assisted metal surface inspection workflows using computer vision and machine learning models.
- Supported inspection report automation and AI-assisted decision-support pipelines.
- Contributed to industrial system design focusing on deployment reliability and on-site usability.
- Focused on system behaviour, validation, and performance improvement through repeated testing and analysis.

PROJECTS

FinKizuna ERP – AI-Powered ERP System (FastAPI, PostgreSQL, AWS, Docker, CI/CD, Isolation Forest) [GitHub](#)

-Built a production-grade AI-powered multi-tenant SaaS ERP using FastAPI, PostgreSQL, and AWS.

-Implemented fraud detection (~94% accuracy) using Isolation Forest + SHAP, along with automated Ringi workflows and real-time decision support.

-Deployed with CI/CD, Nginx, and Docker, focusing on scalability, reliability, and production readiness.

Explainable HIV Drug Resistance System (Python, Machine Learning, SHAP, Bioinformatics, FastAPI) [GitHub](#)

-Developed an explainable ML system for predicting HIV drug resistance using genomic data.

-Built scalable pipelines and improved model performance through iterative experimentation and validation.

-Integrated SHAP-based explainability to enhance transparency in healthcare decision-making.

VERITAS – AI Indoor Environmental Risk Intelligence System (Python, Machine Learning, Data Analytics) [Link](#)

- Built an AI-driven environmental monitoring system analysing multi-parameter indoor air quality data.

- Designed data pipelines with Pandas/NumPy, implemented automated risk scoring, visualization dashboards, and report generation workflows.

- Contributed to backend services, enabled data-driven environmental health assessment for real-time monitoring scenarios.

ZenKensa – AI Metal Surface Inspection System (Computer Vision, Python, Machine Learning) [GitHub](#)

- Developed a computer vision-based defect detection system for manufacturing using OpenCV and ML models.

-Designed inspection workflows improving detection consistency and reducing manual effort by ~20%.

- Implemented defect detection workflows assisting human inspectors in decision-making.

- Focused on deployment-ready system design, enhancing usability and reliability through iterative testing.

CERTIFICATIONS

AI & Machine Learning Core | Python for Data Science | Full Stack Web Development | Version Control with Git & GitHub |

Microsoft Technical Certification | Data Analysis & Excel (Udemy) | Soft Skills Development – NPTEL
